

ILS Actuary

The role

Hiscox ILS is seeking a candidate for the role of ILS Actuary. This unique opportunity is available for a highly qualified candidate to work with the Hiscox ILS team to contribute to the valuation and construction of a diverse portfolio of complex insurance and reinsurance risks within Hiscox ILS managed funds and to help expand our valuations and portfolio management capabilities, producing analytical tools and management information.

This role will primarily support the establishment and administration of valuation procedures of insurance and reinsurance risk together with the underwriting execution of the business plan and the portfolio management analytical requirements that complement the interaction of complex third party capital structures in the business. The successful candidate will ideally have a proven track record in reserving and valuations across multiple (re)insurance classes.

Key Responsibilities

- Develop and administer the valuation policy and procedures for risks written into the Hiscox ILS Funds
- Applying Fair Value actuarial reserving techniques to assist with the monthly valuations for the Hiscox ILS Funds
- Actuarial pricing support across multiple non life (re)insurance classes
- Support and develop Hiscox ILS investment products
- Interact and develop business relationships where necessary with consultants, third parties in support of the successful execution of the role
- Preparing reserving information for regulatory reporting
- Provide actuarial assistance with capital modelling
- Assist with development of the technical capability of the team with appropriate systems and techniques

The Requirements

- Fellow of the Institute of Actuaries or equivalent certification with at least two years post qualification experience
- Minimum of five years of experience in an actuarial capacity
- Extensive technical reserving experience within (re)insurance market
- Demonstrate a challenging and constructive commercial outlook with ability to question the status quo
- Self-motivated, driven and able to lead and gain the commitment of others
- Proven track record of constantly seeking to improve systems and processes
- Confident communicator with the ability to build strong relationships and influence decision making
- Strong mathematical skills with experience in reserving, capital modelling, computer coding tools - ReMetrica, Tyche or similar tools, @Risk, SQL, VBA, ResQ.

Closing Date: May 13, 2019
