

# Join our team as (Senior) Actuarial Associate

The role will support AIA Reinsurance Limited in Corporate Actuarial activities and transactional quality assurance.

## DUTIES AND RESPONSIBILITIES

- Calculate reserves and capital in accordance with Bermuda regulatory requirements
- Review calculation of Embedded Value and carryout associated analytics
- Perform stress testing and risk calculations to support risk management
- Assist with production of management reports and annual regulatory filings
- Perform quality assurance of transactional underwriting models and documents, and risk transfer analytics
- Support the business planning and budgeting exercise
- Support reinsurance administration and claims management
- Maintain and enhance actuarial models, guidelines, and business process manuals

## MINIMUM QUALIFICATIONS, SKILLS AND EXPERIENCE

- University Degree in numerate studies, sciences, or business
- Actuarial Designation: aspiring ASA/FSA/FIA or equivalent; at least three actuarial exams, including life contingencies
- Minimum two years' working in life (re)insurance actuarial roles
- Reserving, modelling, EV, or risk management experience desirable
- Understanding of financial reports (Income Statement and Balance Sheet)
- Technically proficient in MS Office applications (particularly MS Excel and MS PowerPoint)
- Strong leadership and problem-solving skills with a dynamic, results-oriented, "can do" attitude
- Communicates effectively, both written and verbally; collegial approach to conflict resolution
- Is personally flexible, willing to travel and work outside of normal business hours, as required
