

Fabricator/Welder/Panel Beater/Spray Painter

Our client, Island Construction Services Ltd., are inviting applications from suitably qualified persons who possess a minimum of five (5) years' experience in automobile bodywork repair which must include previous experience working light vans, trucks and heavy equipment.

Applicants must be fully conversant with all aspects of metal fabrication, welding (to include: welding, mig/tig welding, and plasma cutting), panel beating and paint spraying.

Applicants must be able to demonstrate that they can achieve a high standard of finish work in all aspects of automobile body repair. It would also be an advantage for applicants to possess a reasonable understanding of basic vehicle mechanics.

The position requires the successful applicant to be flexible and willing to work extended hours. In return an excellent remuneration and benefits package will be offered.

Applicants must have their own transportation and be able to furnish written references from previous employers in support of their application, which must be submitted in writing to the address below no later than: 6 August 2019
