The role

- Price, clean data, write codes in SQL, Python and VBA, assist in building and run models to quantify Cyber Risk.
- Work closely with CUO and technical team to price and structure cyber reinsurance deals.
- Review contracts and maintain adherence to the underwriting guidelines.
- Monitor portfolio aggregation – per risk and occurrence and report back to carrier when required.
- Reporting and presenting carrier about the portfolio in regular intervals.
- Assist in writing claims report to assist carrier partner.
- Any other projects assigned to you.
- Maintain and report the bordereau as collected by reinsurer.

Profile

- Associate level Actuary
- Minimum 1 year experience in actuarial pricing, structuring or underwriting experience in cyber reinsurance
- Strong Programming Knowledge: SQL, R, VBA , Python, deep learning programming
- 7 years + experience in insurance
- Cyber analytics understanding
- Required expertise in Insurance Operations/Strategy/Underwriting, Risk Transformation and transfer and Reinsurance
- Excellent spoken and written English
- Excellent analytic skills
- Ability to build relationships both internally and with clients, influence at all levels and adapt to different environments
- Strong personal and communication skills
