

SHED Limited is seeking an Operational Project Accountant

The company's business is focussed upon providing project based professional financial services to group affiliates in Bermuda, and to local and exempted company clients in a variety of business areas, with particular emphasis on local business start-ups backed by private equity funding. The successful candidate will provide services on an outsourced basis to a number of client organisations. Remuneration of this role will be linked to each project agreement which the company secures.

We are seeking a commercial, qualified senior financial professional, with CPA or equivalent qualification and CFO experience, with proven technical ability, skilled in establishing, leading and training finance teams. Utilising his or her significant experience of working in a start-up operational environment, the successful applicant will manage a number of projects for new businesses seeking to raise private equity funding to secure acquisitions and fund business ventures.

The ideal candidate must be able to balance the commercial and strategic needs of the client's business with financial prudence. The successful applicant will work with the client CEO and board on strategic objectives and produce operational plans and financial projections as required by the client. The successful applicant will be leading the analysis, development and submission of capital investment proposals. Attention to detail and clear focus on end results is critical.

The successful applicant will also be responsible for generating and monitoring appropriate management information to support a growing portfolio of businesses. This role will require professional level accounting, financial reporting and funding strategy skills and experience, combined with a significant degree of operational project management skills and strong IT focus.

Detailed Duties & Responsibilities:

- Overseeing and implementing private equity funding projects for group affiliates and client businesses.
- Understanding the business of each project, providing technical resource on the delivery, set up and ongoing accounting for clients.
- Establishing and maintaining strong relationships with all associated parties (external counsel and other professional consultants) to support operational success of a client project.
- Develop and ensure the application of client company's policies, and operating procedures as appropriate for each new project.
- Deploy effective leadership skills to challenge and inform the board, driving operational and financial improvements throughout the business.

Minimum Qualifications, Skills & Experience:

- A finance graduate with numerical focus and a professional accountancy designation (CPA or equivalent) with significant CFO level experience in acquisitions, joint ventures and private equity backed business, including financial reporting and operational management.
- Experience in raising and implementing debt and private equity finance.
- Practical experience in overseeing the financial aspect of business acquisitions, mergers and equity investments.
- Proficient in all aspects of cash flow and working capital management.
- Exposure to international businesses and familiar with varied reporting frameworks.
- Strong analytical ability with proven initiative and ability to manage a number of projects and prioritize a broad range of activities.
- Willing and able to travel and be able to conduct business with multiple other functional areas.
- Possessing advanced excel modelling skills and experience of implementing and developing ERP systems.
- Strong interpersonal skills and exemplary client facing etiquette.
