

## **Product Development and Performance Specialist**

Our client, TNT Innovative Solutions Ltd, is seeking a Product Development and Performance Specialist to be responsible for sourcing, forecasting and identifying products, in addition to doing high performance modifications. The successful applicant must have knowledge of high performance parts, troubleshooting repeat repairs, forecasting parts and inventory reporting. Must be able to diagnose problems in malfunctioning equipment, recognizing components that require repair or replacement and have the ability to write reports regarding problems with faulty parts. This position entails extensive knowledge of motorcycle parts and performance parts, as well as the ability to communicate clearly with customers regarding the nature of and solution to their problems; assist with estimates and associated costs and keep accurate records and manage diagrams and manuals. Must have at least three (3) years' proven experience and possess a high level of expertise on various motorcycle and performance parts provided by overseas suppliers. Experience with lathe machine, milling machine and dyno would be an asset. The company provides a wide range of motorcycle repairs and will vary depending on the parts required. A technical or relevant vocational certification is required. Must be willing to work weekends.

Interested applicants are invited to submit their resume and two written references to: Wright Consulting, P. O. Box DV 569, Devonshire DV BX, Attn:  
TNT Innovative Solutions Ltd.

not later than 16 December 2019. Tel 292-4551
