

## Senior Architect- Enterprise Infrastructure

CCS Group Limited is a Bermuda based full service Information Technology Company that provides Local and International customers with advanced communications solutions and consulting services.

CCS Group Limited is seeking to employ an enthusiastic IT professional to join CCS' Enterprise Networking Division. The Senior Architect role is an entry level management position and the successful candidate will be responsible for the professional development of the enterprise networking technical team. The successful candidate will also be responsible for assisting the sales team with solution designs, proposal content, project scopes, project plans and overall presales assistance. The Senior Architect, will also be expected to assume a senior role with the implementation of complex enterprise networking projects and hands on tools where necessary.

The successful candidate must be comfortable working in diverse customer environments with a multitude of technologies related to Local Area Network (LAN), Wireless (WLAN), Wide Area Network (WAN), Firewall and Network Management solutions. The role reports directly to CCS' VP Technical Operations but a demonstrated ability to succeed in an autonomous environment is key to this role.

### Required Experience and Certifications:

- A university degree and/or equivalent related industry certification
- 10 years of experience in a similar role providing technical IT support in a similar role inclusive of project management
- Valid networking infrastructure (routing, switching, wireless etc.) specializations from Cisco
- Valid networking professional certificate from Cisco (CCNP or higher)
- Valid wide area network (WAN) optimization certifications from any major manufacture (Cisco, Riverbed, Silver Peak etc.)
- Extensive demonstrated experience Cisco core networking infrastructure (routing, switching, wireless etc.) design, implementation and operational skills
- Strong Data Centre networking design, implementation and operational skills
- Demonstrated ability to install and troubleshoot complex global network infrastructures
- Working Knowledge of standard project lifecycle phases
- Prior experience in management and mentorship of junior IT consultants
- Excellent verbal and written communication skills
- Experience with Microsoft Visio, Microsoft Project, and Cisco online tools such as Cisco Commerce Workplace (CCW)
- Professionally presented with strong customer-facing skills and the ability to build and maintain working relationships with customers at all levels
- Experience with the following would be considered advantageous – Software Defined Networking and Wide Area Networking (SDN and SD-WAN), Network Function Virtualization (NVF), Cisco Prime Infrastructure (PI), Cisco Unified Computing System (UCS), Ekahau or AppNetta
