

## **Companion/Caregiver/Nanny**

One family split between two households.

This live-in role requires a patient, caring person who can provide day time companionship for the family's energetic, adventure seeking elder with dementia. Building a long-term relationship is essential for our family. An energetic caregiver who loves gardening, walking and crafting is ideal for this role. Shopping, diabetic meal preparation required for the main household and the second household when parents are traveling. Light housekeeping and laundry for our elder required.

There is already a main housekeeper for both households. The responsibilities would also include assisting with the care of 2 active children ages 8 and 6 as needed at the second family home. Particular assistance required for the 2nd home especially during parents' travel.

### **Minimum Qualifications & Experience**

Previous dementia care experience is an asset. Willing to take dementia care certification when available on island. Nursing experience and/or certification would be an asset. Experience with child care and Nanny experience 5 to 10 years. Supporting references required.

### **Required Competencies, Skills & Abilities**

Patient and compassionate disposition. Honest and loyal. CPR/FirstAid/SCARS certification (or willing to obtain). Diabetic & normal meal preparation required. Valid Driver's license. Strong wimmer essential. Light house-car/laundry/grocery shopping. Sense of humour always welcome. Willingness to help.

**\*\*\* MUST LOVE DOGS & CATS \*\*\***
