

MECHANICAL PROJECT MANAGER/ENGINEER

Our client, Efficiency Limited, a Bermudian mechanical contracting and service company, is seeking applicants for the position of Mechanical Project Manager/Engineer. The successful applicant will work closely with the current management team in moving the company from their current market position to meet the future needs of our existing and future clients.

Duties will include:

- Design and manage mid-size and large mechanical design & build projects
- Negotiations with building owners, developers, architects and project managers to develop, design and build world class projects in Bermuda
- Work with our estimating team to provide competitive Design & Build proposals
- Interface and work with our existing client base to create new business opportunities
- Provide project commissioning and handover support
- Promote sales and marketing of the company's products and services
- Support of our field installation and sub-contracting team
- Coordinate with our field team and project owner/developers to implement system changes and upgrades as required
- Maintain detailed and accurate project manuals and commissioning reports
- Provide regular and detailed cost reports to management and site superintendents
- Work with our service division to improve operating efficiencies of existing mechanical systems

Qualifications, Skills and Experience

- Minimum of a Bachelor's Degree in Engineering
- Minimum of 7 years' working experience in designing or management mid-size and large commercial and/or residential projects
- Locally registered Professional Engineer or eligible for local registration
- Experience with the design and construction of LEED certified buildings will be an advantage
- Experience designing mid-size and large residential and commercial projects
- Project management experience with mid-size and large residential and commercial projects
- Desire to expand engineering/project management skills and to become part of the company's future growth, development and management team
- Highly accurate and detailed oriented
- Results oriented, highly effective and strong work ethic
