

MS Amlin AG was established in 2010. It is incorporated in Switzerland and operates in Zurich with branches in Bermuda, Malaysia and the USA. MS Amlin AG is a wholly-owned reinsurance subsidiary of Mitsui Sumitomo Insurance Company, a division of the MS&AD Group of Japan, the eighth largest non-life insurer in the world.

We are currently looking to recruit an enthusiastic **Reinsurance Modelling Manager (Business Partner)** for our Bermuda or Zurich office.

This role will focus on improved quality of service to MS AAG regarding catastrophe modelling output and support, including identifying and delivering on requirements of key stakeholders, with the support of the Catastrophe Modelling and Development team. This role is critical in delivering the level of catastrophe modelling support and client intimacy expected within MS Amlin. This role will report to the Head of Risk Analytics.

Your Responsibilities

- Act as a dedicated “business partner” to MS AAG in order to ensure delivery of required level of service from the MS AAG Risk Analytics teams.
- Provide quantitative inputs into support to MS AAG strategy, portfolio management and outwards programme design.
- Provide analytical support to key accounts throughout client quoting process.
- Provide narrative support for all catastrophe modelled figures.
- Deliver a tailored catastrophe modelling offering through business planning.
- Ensure delivery and communication of key MI and reporting.
- Overall accountability for delivery of agreed catastrophe modelling support and service to MS AAG.
- Ensure the MS AAG Risk Analytics team maintains and grows strong relationships with other MS Amlin teams – challenging and analysing data to assist in better risk decisions, and providing an effective narrative to output.
- Own the cat risk profile being represented by the MS AAG modelled catastrophe portfolio.
- Lead analytical support to MS AAG’s clients in respect of the Exposure Management Framework; clearly identifying the needs of the key customers and develop effective approaches to respond to these, adopting a proactive approach to delivering services that exceed expectation.
- Provide technical leadership of MS AAG’s toolkits and catastrophe modelling development projects, ensuring projects are delivered on time and to budget.
- Ensure return on investment for MSAAG’S specific projects and catastrophe models is understood, challenged and realised. Develop business cases and gain key stakeholder buy in as appropriate.
- Where appropriate, be involved as a key market contributor to early adopter programmes, ascertaining the competitive advantages for MS Amlin and successfully driving change in the business as appropriate.
- Ensure compliance with Catastrophe Modelling Procedures.
- Conduct role in accordance with the Company’s Business Ethics Policy and Lloyd’s and other regulations.

Your Profile

- Minimum of 10 years’ established experience in catastrophe modelling, for inwards treaty and reinsurance business across multiple companies including managerial experience within a modelling team.
- Good understanding of EP curve construction, ELT, YLT, YEQT and stimulation processes, including treatment of uncertainty.
- Strong experience of using RMS and AIR catastrophe modelling product including understanding of background tables and the financial module.
- Thorough understanding of all relevant components of the modelling, pricing and portfolio management process.
- Good understanding of the business, stakeholder, and vendor environment.
- Proven ability of strong project management and delivery skills.
- Proven experience managing complex environments.
- Ability to effectively solve complex problems in a pro-active and effective manner.
- Excellent relationship building skills.
- First-class communication skills.

Your Application

Please apply directly via our Career Website by Thursday, September 9, 2021.
