

We are in need of 2 Agricultural Consultant (Agronomist)

Job Summary

Agricultural consultants provide advice on the use and management of agricultural land. Typically they specialize either in business or technical expertise; specialists in the former area advise agricultural landowners on financial issues and business strategy, while technical specialists consider how to make the most effective use of the land. Technical specialists often focus on a particular area, such as pollution control, forestry consultancy, or crop rotation. Whatever the specialization, the ultimate aim of an agricultural consultant is to balance the commercial viability of agricultural land with sustainable development.
