

# Water & Waste Water Process Controller

## Plant Management

Employment Opportunity

**BELCO**

**Application  
Deadline:**

Tuesday  
February 15, 2022

The Water and Waste Water Process Controller is mainly responsible for overseeing and running the Reverse Osmosis (ROP) and Oily Water Treatment Plants (OWTP) ensuring the proper operation and maintenance of Clean & Oily Water Treatment. The role involves acting as Spill Team Leader operating the PACS 1000. The incumbent also occasionally operates and maintains the Hydrocarbon Recovery Centres.

### Key Responsibilities

- Manage the performance and development of all assigned employees (crew members) and ensure that the department is running smoothly
- Ensure proper general operation and maintenance of ROP & OWTP
- Monitor processing of Oily Waste Water ensuring proper throughput to avoid any overflow of EQ tank
- Monitor processing of Waste Lube Oil ensuring proper throughput for timely use of Eurotainers
- Ensure that BELCO Plants are in compliance with local legislation and regulations
- Develop and implement OWTP policies and procedures in consultation with internal and external resource persons
- Keep abreast of current local and international RO & OWTP issues, trends, technologies and standards that may influence BELCO's operations and/or regulatory climate and make appropriate recommendations
- Assist in developing, preparing and monitoring departmental budgets for areas of responsibility
- Perform team member's responsibilities

### Education and Experience

- College certificate in Water and Waste Water Protection technology or equivalent work experience
- Between five (5) to seven (7) years working experience in Water and Waste Water Process with two of those years as Team Leader is preferable

### Knowledge, skills and abilities

- In-depth knowledge of Water and Waste Water Process
- In-depth knowledge of technical issues, particularly relating to water and waste water protection
- Working knowledge of Plant Operations and Maintenance
- Working knowledge of Government and BELCO's Health & Safety legislation, standards and regulations
- Working knowledge of Applicable Collective Bargaining Agreements (CBA) and of HR policies and practices
- Excellent technical skills demonstrating a clear understanding and comprehension of plant operations and water and waste water protection
- Strong problem solving skills with ability to collect, collate and analyze data, identify problems, determine root cause and make decisions and recommendations
- Attention to detail and accuracy
- Commitment to excellence and continuous improvement
- Proven abilities in utilizing & developing a range of software packages related to water and waste water protection
- Good written and verbal communication skills
- Good interpersonal and leadership skills with the ability to liaise with all levels of the organization and with external stakeholders
- Good planning, organizational and time management skills
- Good computer skills, proficiency with Microsoft Office suite of program an asset
