

Our client, **Conduit Re**, a growing Class 4 Reinsurance company, is seeking a **Senior Systems & Cloud Engineer** to join their team. Conduit Re is a pure play global reinsurance business built for the next generation of underwriting. They embrace the latest, most powerful technology available to provide the best products and service to their customers. Launched in December 2020, they've recently completed their first full year of operations. Conduit Re offers candidates an exciting growth opportunity with ambitious plans.

The **Senior Systems & Cloud Engineer** will report directly to the Operations Manager. The role provides for great scope to collaborate with various department while being part of a dynamic and energetic team. The successful candidate will need to be a highly motivated individual who is collaborative, energetic, forward thinking, with an entrepreneurial mindset.

#### **Duties and Responsibilities:**

- Implement, configure, and manage Microsoft 365 and Azure environments following best practice and industry standards
- Perform regular backup operations and implement appropriate processes for data protection and disaster recovery
- Ensure Cyber Security best practices are implemented and followed including review of security logs
- Provide technical support and guidance to users to resolve various computer and network related issues
- Monitor and resolve submitted tickets with a focus on service level agreements and remediation
- Identify and document processes and knowledge-based artifacts accurately and in a timely manner
- Drive key technology transformations in support of the achievement of business goals, while ensuring stable and predictable day-to-day IT operations
- Develop and maintain good working relationships with business partners, co-workers and vendors to perform job functions effectively
- Drive adoption of automation and efficiencies using technology throughout the company

#### **Qualifications and Experience:**

- Bachelor's degree in science or technology or other relevant qualifications
- Minimum of 7 years of relevant, progressive experience in technology roles
- Technical certifications in areas such as M365, Azure, Information Security, ITIL and Project Management would be advantageous
- Experience planning, architecting, and delivering Cloud solutions including Microsoft Azure and Microsoft 365
- Experience with Azure Storage and Azure Networking technologies
- Strong technology and software architecture background and experience
- Excellent knowledge of Cyber security and information security
- Demonstrated record of successful project completion with minimal supervision including skills in design, requirement gathering, project planning, prioritization, coordination, multi-tasking, and problem solving
- Strong organizational and time management skills
- Ability to prioritise while remaining flexible to deal with changing work demands
- Good interpersonal, written and oral communication skills
- Comfortable working independently and as part of a team

Applications may be submitted via email to **info@frontier.bm** or in writing to **Frontier Financial Services Limited**, Wessex House, 1<sup>st</sup> Floor, 45 Reid Street, Hamilton HM12.

**Closing date: March 28, 2022.**
