Senior Systems Integration Technician

Our client, Precise Systems Integration Ltd., is seeking to fill the position of Senior Systems Integration Technician. The successful candidate must be able to work flexible hours to meet customer requirements. Overtime may also be required.

This is a hands on position; will be responsible for planning, installing and commissioning projects related to our Integrated Solutions Division for residential and commercial buildings from inception to client handover. Our Sr. Systems Tech will have proven experience with; Basic programming support and system configuration of Crestron and related systems, Large format displays, Distributed Audio, Lighting control, System control and Application integration, A/V conferencing, Pro A/V solutions in a commercial, corporate and residential environment.

Responsibilities also include: Demonstrate ability to assess work orders, plans, and installation manuals to determine the types of equipment or materials needed for jobs; conduct pre-installation site surveys; identify overall project needs; liaise with clients & vendors to ensure that project deliverables and milestones are met, meet or exceed industry established performance criteria, while managing conflicting priorities. Provide exceptional service to our clients, vendors & related subcontractors to ensure complete working system within the parameters of the project schedule and client's expectations. Demonstrate systems for customers and explain details of system functionality and controls for end users.

Minimum Education, Skills & Experience:

Successful candidate will demonstrate effective organizational skills with excellent attention to detail and a proven ability to work under pressure, assess multiple demands, manage priorities, and proven excellent computer skills, including proficiency with Microsoft Office Suite. Must have a valid driver's license for commercial vehicles and safe driving record or willingness to obtain.

- High school diploma, minimum of 7 years' proven and progressive experience in Pro A/V and electronic Integrated systems installation.
- Prior experience with Crestron, Autonomics, Extron and lighting automation would be a distinct advantage.
- Proven experience supervising junior technicians.

Physical Requirements & Working Conditions – dexterity of hands and fingers; bending, kneeling, crouching, reaching and standing for extended periods of time; heavy lifting and carrying materials; and using ladders and working in cramped spaces. Precise has a comprehensive Drug and Alcohol policy, all applicants will be tested.
