## SENIOR ELECTRICAL ENGINEER

Onsite Engineering Ltd. is a Bermudian founded company that offers a wide range of engineering focused services including Mechanical, Structural, Electrical, Civil, Fire, Marine, Energy & Sustainability alongside providing consulting services utilizing Building Information Modeling (BIM) processes to help you plan, design, construct, and manage your buildings and infrastructure is seeking for a qualified Senior Electrical Engineer for general construction industry projects.

### KEY ROLE AND RESPONSIBILITIES:

- Electrical Engineering design and drafting for commercial and residential power (high & low voltage), lighting, data, comms, fire and life safety and control systems.
- Tools required are 2D and 3D AutoCAD MEP, Revit and energy modeling programs.
- Multi-discipline engineering coordination, design assistance, and data entry also included.

### QUALIFICATIONS AND EXPERIENCE:

- Electrical Engineering undergraduate degree with P.Eng. or equivalent professional qualification.
- Minimum 5 years electrical engineering design.
- Autodesk AutoCAD, Revit, Microsoft Office.
- Knowledge of local codes are required

All applicants will be required to sit a computer/written examination during their interview to assess Revit modeling, drafting and design skills along with basic engineering comprehension.

Remuneration will be based upon experience and commensurate with industry standards.

The successful candidate will be a motivated and driven individual who enjoys working in a collaborative, multi-disciplined and forward-thinking environment.

At Onsite, we offer autonomy, and the position of Senior Electrical Engineer attracts a competitive compensation package that rewards growth of our client base.

If this resonates with you, we welcome your interest! For more information, or to confidentially apply, please reach out today: [admin@onsite.bm](mailto:admin@onsite.bm).

Closing Date: April 6th, 2022
