Wednesday,  
November 2, 2022

# Fire Protection Assistant Technician

At AIRCARE, excellence is every day. If you are committed to service excellence and have the relevant experience, we invite your application for the position of **Fire Protection Assistant Technician**.

### Key Responsibilities:

- Fire pump and sprinkler system installation, maintenance, inspection and testing to NFPA20 and NFPA 13/25
- Special Hazard Systems installation/inspections to NFPA 12/a2001 Fire Code
- Understanding of commercial Kitchen Systems installations/inspections to NFPA 17a/96
- Understanding of Room Integrity Testing
- Fire alarm system installation, inspection and testing to NFPA72
- Fulfill contract obligations effectively and efficiently
- Carry out fire systems installation work quickly and professionally as directed with supervision
- Develop relationships, establish trust and identify opportunities with building owners
- Assist with the acquisition of pull-through work and notify the appropriate AIRCARE sales team members of opportunities
- Assist with the development of solutions when appropriate
- Assist others on projects when needed
- Responsible for accurately assisting in completing and turning in all service reports, inspection sheets and timesheets in a timely manner
- Follow planned forecasted work and schedules with the Coordinator Customer Service team
- Maintains customer satisfaction by investigating concerns and implementing corrective action, with customers and staff as needed
- Works closely as a team member with other parts of the business
- Flexibility to work overtime/weekends, as required
- Dress appropriately and within the Company guidelines to represent a professional service
- Maintain any assigned Company vehicle cleanliness, tools and safety equipment
- Adhere to all health and safety requirements
- Always demonstrate a positive attitude
- Report directly to the Fire Protection, Projects & HSE Manager
- Demonstrate and promote a spirit of cooperation and teamwork throughout the Company
- Continually look for ways to improve our processes and ability to serve our customers effectively
- Improve your personal performance on a continual basis. Suggest training programmes or other opportunities for improvement to your manager as they apply

### Key Qualifications/Abilities:

- Minimum of 2 years experience in a fire protection installation, testing and inspection field
- Have experience with installing, inspecting and maintaining fire sprinklers and electric and diesel fire pump systems
- Demonstrate a willingness to gain essential required certification and training required for the post
- Ability to read and interpret mechanical drawings and electrical schematic diagrams
