

MAINTENANCE TECHNICIAN (Electrical & Plumbing)

The Bermuda Institute of Ocean Sciences (BIOS) is an independent U.S. not-for-profit marine research and educational organization based in Bermuda. For over 100 years BIOS has been committed to seeking and sharing fundamental knowledge of the oceans and complex environmental issues through exploration, hands-on programs, cutting-edge technology, and state-of-the-art research methods.

BIOS is seeking a suitably qualified, experienced, individual to maintain all buildings with regard to electrical and plumbing repairs/installations, and provide support services to the highest possible standards.

Key Responsibilities will include:

- Provide support services in the realm of a skilled plumber and electrician – both inside and outside of all buildings, to the specifications of the Facilities Manager. This includes installation and repair of plumbing, electrical work and painting.
- Monitoring inventory and purchasing of all electrical and plumbing supplies in conjunction with the Facilities Manager.
- Assisting with other general maintenance work.
- Timely reporting of potentially serious problems, particularly those which will affect safety, service or budget.
- Ensure that work is done professionally and in a timely manner.
- In emergencies, be prepared, or take the initiative, to turn out for work at short notice and at unsocial hours.
- Assisting with other work projects as needed.

The successful candidate should have:

- Certification or equivalent in plumbing and electrical work.
- Knowledge of and several years' professional experience in building and maintenance with regard to plumbing and electrical work.
- Proficient in general maintenance.
- Demonstrate good work ethic and willingness to assist or carry out with jobs not necessarily related to electrical or plumbing work, as required by the Facilities manager i.e. moving/installing furniture, painting, clean up, masonry, etc., based upon the needs of BIOS.
- Current, clean, light and intermediate truck driving licence required.
- Experience in supervising and training other staff.
- Be self-motivated, with the ability to work in a professional manner, either unsupervised or as part of a team.

Interested candidates should **email** applications, with cover letter, detailed resume and references to **hr@bios.edu** (**please reference the job title in the subject line of email**):
