

## **POSITION DESCRIPTION**

Northshore Medical Center (NMAC) is a dynamic multidisciplinary patient centered medical facility and is seeking the services of a Medical Laboratory Technologist to support this fast-paced, rapidly growing medical practice. This person will be specifically responsible for providing information for diagnosis, treatment, and prevention of disease by conducting medical laboratory tests, procedures, experiments, and analyses.

## **RESPONSIBILITIES**

- Determines normal and abnormal components of body fluids by conducting chemical analyses of blood, urine, spinal fluids, and gastric juices.
- Analyzes blood cells by counting and identifying cells, using microscopic techniques and procedures.
- Prepares blood, plasma, and platelets for transfusions by conducting blood group, type, and compatibility tests. Ensures operation of analyzers, and other laboratory equipment by calibrating; completing preventive maintenance requirements; following manufacturer's instructions; troubleshooting malfunctions; calling for repairs; maintaining equipment inventories; evaluating new equipment and techniques.
- Maintains laboratory supplies inventory by checking stock to determine inventory level; anticipating needed supplies; placing and expediting orders for supplies; verifying receipt of supplies.
- Conserves laboratory resources by using equipment and supplies as needed to accomplish job results.
- Provides medical technology information by answering questions and requests.
- Prepares reports of technological findings by collecting, analyzing, and summarizing information.
- Maintains professional and technical knowledge by attending educational workshops; reviewing professional publications; establishing personal networks; participating in professional societies.
- Maintains inter- and intradepartmental workflow by fostering a spirit of cooperation.
- Maintains safe and clean working environment by complying with procedures, rules, and regulations.
- Protects patients and employees by adhering to infection-control and hazardous waste policies and protocols, following identification procedures.
- Maintains patient confidence by keeping information confidential.
- Contributes to team effort by accomplishing related results as needed.
- Perform phlebotomy services
- Assist with the accreditation process and ensure standards are adhered to

## **QUALIFICATIONS / EXPERIENCE**

- Must hold a BSc in Medical Laboratory Technology from an accredited institution in the US, UK or Canada
- Must be certified by the Bermuda Medical Lab Technology Council
- Must have at least 3 years of experience
