Ariel Re

ROLE:	**AVP - Applications & Management Information**
CLOSING DATE:	**January 25th, 2023**
DEPARTMENT:	**Application Services**
REPORTS TO:	**Head of Application Services**
LOCATION:	**Bermuda**

The Role

The AVP, Applications and MI is responsible for supporting the department head in the design, development, maintenance and management of the application / information architecture and delivering management information and business intelligence to various stakeholders. This position will support the Reinsurance application landscape including Leadership, Financial and Operational reporting.

This dynamic role requires a multi-tasking, detail orientated, technically experienced individual who is able to contribute significantly towards the various enhancement initiatives being undertaken, while being broadly cross-trained across all activities within company operations.

Key Accountabilities

• Assist the department head in owning application development, maintenance and growth of all reinsurance systems, management information and financial reporting, including the analytical review of underwriting data, general ledger inputs and performance metrics for leadership
• Assist in development of technical data flow documentation to satisfy operational compliance requirements
• Co-ordinate and develop testing scripts with all departments for system upgrades and execution
• Assist in the evolution of applications to support Reinsurance process flows, to include the development of new functionality, applications, reports, controls and solutions, as required by the business
• Assist the department head in owning applications and data for periodic Lloyd's submissions and BMA reporting
• Function as external and internal liaison with auditors to facilitate queries and ensure compliance with SOX control framework
• Other duties as required

Role Requirements, Qualifications, Skills & Competencies

• 5 years' recent DXC policy & claims administration system experience (Xuber, SICS, Iris, Genius)

• 5 years' experience programming & supporting SQL, preferably Microsoft T-SQL

• 5 years' recent experience in the Lloyd's of London market including required submissions and messaging sub-systems

• Recent Visual Studio and GIT or TFS/TFVC (Team Foundation Server) experience

• Reinsurance accounting experience (processing of proportional, non-proportional, assumed and ceded business) and exposure to reinsurance systems and general ledger systems

• Familiarity with operational functions and relevant applications support

• Recent experience with MS Azure DevOps and detailed technical knowledge of Agile project management concepts, especially scrum and Kanban

• Familiarity with reinsurance finance & actuarial functions and relevant application support

• Proficiency in the Microsoft Office Suite of applications

• Excellent verbal and written communication in English

• Flexibility to work non-traditional office hours as needed

Our Commitment to You

An opportunity to join a highly reputable, global organization and work within a team of talented and innovative professionals.

A rewards package that includes:
• Competitive salary and profit sharing arrangement
• Comprehensive benefits, including health and wellness plans, life insurance and retirement planning
• Opportunities to support your career development
