

WE'RE HIRING!

OPERATIONS MANAGER

The BE Solar Operations Manager (OPM) will play a critical role by leading the operations team to manage all solar, energy storage and energy efficiency (e-works) projects. The OPM manages all customer service needs and requests to ensure BE Solar continues to have the best reputation for the highest quality & service in the industry. BE Solar seeks a diligent, versatile, outgoing and experienced professional to fill this role as our team continues to grow.

Position Description:

The OPM is required to ensure that all BE Solar projects consistently meet the highest level of quality and are completed in an efficient, cost effective and professional manner. The OPM is required to communicate with all clients, installation teams and office staff to clearly explain when projects will be started, are in progress and will be completed. The OPM must ensure that the BE Solar team exceeds client expectations on all projects.

Required Knowledge, Skills & Abilities:

- A bachelor's degree in the relevant discipline along with at least 5 years of directly relevant experience
- Meticulous attention to details, quality control, expert communication and leadership skills
- Project Management (PM) Certification and a successful experience in a similar role (preferred)
- NABCEP certifications - PV Associates Certification required (Board level certification preferred)
- Willingness to work overtime and outside of normal business hours to meet the requirements of the role
- Required to provide written schedules for each job and a gantt chart to plan for material operations, labour planning, costing, equipment required, compliance with inspections, building codes etc.
- Ability to work with office staff to manage budgets and meet financial expectations of projects
- Knowledge of solar installations, NEC 2020 and all Bermuda building code requirements
- Extensive experience maintaining an understanding of trends associated with the renewable energy industry (both locally and internationally) in the electrical, construction and energy fields are a requirement
- Obtain and maintain a current Bermuda intermediate truck driving license
- Required to be a team player in a progressive company involved in a growing industry
