Underwriter

The successful candidate will be responsible for underwriting, modeling a portion of the U.S. property catastrophe book of business, administering internal reporting and marketing to visiting clients. They will provide analysis, modeling and underwriting recommendations of assumed risks. This individual will play a lead role in system developments and act as a resource for new product methodology.

Responsibilities include:

- Underwrite U.S. property catastrophe and specialty businesses
- Maintain key relationships with clients of U.S. property catastrophe reinsurance
- Administer internal reporting tools for tracking premium and results
- Analyze, model and provide recommendations on assumed primary and retro catastrophe excess of loss submissions, capital market transactions and non-catastrophe risks
- Investigate, evaluate, provide guidance and implement, when necessary, current and new catastrophe models
- Manage relationships with catastrophe model vendors
- Extract, manipulate and report (using REMS/GEMS) on modeling information regarding assumed industry portfolio for loss analysis, etc.
- Create, expand and remain abreast of industry trends in coding tools (UNIX, PERL, Visual Basic and Access)
- Analyze and model Workers' Compensation catastrophe treaties

Education, Skills & Experience:

- Bachelor's Degree preferably with an emphasis in economics, math probabilities, or statistics techniques or simulation (or an advanced scientific degree)
- Professional insurance qualification favorable
- Legal, accounting and/or financial background preferred
- 15 years or more experience in a similar role is an advantage
- Supervisory experience in directing and training underwriters and analysts
- Thorough understanding of insurance conditions, products and markets where RNR is present
- Knowledge of U.S. insurance markets gained via underwriting experience as well as through extensive connections with U.S. clientele
- Proven contacts with producers and cedants of the U.S. property catastrophe market
- In-depth understanding and experience of all commercially available catastrophe models and probability/statistics
- Excellent computer skills, computer science techniques /programming/ applications and a working knowledge of database manipulation tools
- Demonstrated proficiency in the use and knowledge of the REMS (and /or GEMS) system
- Excellent interpersonal skills and the ability to communicate professionally with underwriters, clients and outside vendors

This is an excellent opportunity for a flexible individual who is a self starter with the ability to be productive under pressure. This is a fast-paced and rapidly changing business environment which requires an individual with an energetic and enthusiastic approach, along with maturity, self confidence and self motivation.
