

P.R.P. Performa Ltd.

require a

Senior Developer

P.R.P. Performa Ltd. is an independent portfolio investment management company with a client base consisting primarily of Bermuda and Cayman-based captive insurance companies. The company also manages a number of fixed income mutual funds.

The company is seeking a dynamic and self motivated individual to join its Information Technology team.

Responsibilities will include but are not limited to:

- Design, build, deploy and maintain interfaces to third party investment portfolio management and trading applications such as Charles River Investment Management System, Bloomberg and Trade Web.
- Manage a number of on-going IT projects after consultation with COO, traders, portfolio managers and back office vendors.
- Work with third party analysts, other developers and IT professionals to coordinate the development process and meet project deadlines.
- Conduct system-wide tests, provide user technical support and monitor system performance to ensure the Charles River Investment Management system is operating optimally.
- Build and deploy web applications, web services, rich intranet applications, SQL database management/administration and reporting in support of trading activities.
- Manage the Company's disaster recovery and business continuity plan.

Desired Qualifications and Experience:

- University degree (preferably in mathematics/sciences/information technology) with a minimum of 5 years financial services experience in the use of Microsoft development tools (including WinForms, ASP.Net, JQuery, MVC, AJAX and the AJAX control toolkit, JavaScript, Visual Basic).
- Thorough working knowledge and understanding of Charles River Investment Management Systems (v8.2).
- Excellent working knowledge in regards to Microsoft C+ / VB.Net and Microsoft SQL Server 2000/2005/2008 (including DTS, SSIS, SSAS, SSRS and T-SQL).
- Sound working knowledge designing and building web services using ASP.NET and WCF. Must also be proficient in HTML and XML (Knowledge in PHP will be an advantage).
- Good knowledge of agile techniques including Test Driven Development and Team Foundation Server (TFS) for version control and continuous integration.

Beneficial

- Microsoft certified in the field of development in application development, web development and SQL Server; ability to use crystal reporting tools and knowledge of Microsoft CRM Application.
