For over 20 years, Applied Computer Technologies has offered professional managed and maintenance services as well as product fulfillment. We believe in building strong relationships with our clients and suppliers to take advantage of and strategically use today's and tomorrow's technologies.

systems engineer

Applied Computer Technologies is seeking applications for a highly qualified and experienced professional, capable of identifying, delivering and supporting technology solutions that meet the strategic business needs of our clients.

As a member of our rapidly expanding professional services team, the successful applicant will be involved in all aspects of projects, including pre-sales needs analysis, systems design, proposal preparation and presentation, project scheduling, systems implementation and support with a focus on Microsoft network, server and desktop management.

To be considered for this position you should have significant experience and qualifications in the following areas:

- Microsoft Desktop Operating Systems including server and printer maintenance and repairs
- Advanced experience with Microsoft Active Directory
- Microsoft Exchange Server Administration
- Experience with Physical and Wireless LAN implementation and support
- SAN Management and maintenance
- Knowledge and experience of SCADA, GIS and CYMEdist Power Distribution Management Systems
- Experience with Citrix administration
- Exceptional and demonstrable consulting, customer service and relationship building skills, with the ability to interact well with a wide range of people
- Excellent written and verbal communication skills, with the ability and drive to complete reports in a timely manner
- MCSE, MCP, or CCNA certification
- VMware Certified

Interested candidates should apply in writing, with a resume and at least two written references, no later than June 16, 2011 to:
