Vice President - Information Systems

We are seeking a top-notch candidate who will bring technology leadership and a customer-driven focus to the organization in order to provide innovative and consumer-friendly services and solutions. Reporting to the Chief Executive Officer, the successful candidate will be responsible for the planning and execution of the information systems vision and goals and will act as a change agent by providing guidance on enterprise-wide systems that will better position Argus for the transformations occurring in the marketplace.

Key Responsibilities:
• Provide strategic leadership and management to the company in the area of technology and its application with customers and employees
• Development of corporate information systems strategy and target operating model including architecture design, skills assessment and risk analysis to support the long terms goals of the Argus Group Business model
• Overall control of the risk management and business continuity of the IT functions
• Leadership and management of the IS Department employees, management of performance and succession planning issues
• Lead and maintain the corporate governance and control framework for IT in the Group
• Oversee corporate policies and procedures, technical standards, methods and priorities
• Develop and administer department operating and project plans and budgets
• Direct and control the information systems, network services and data processing for the company in a high quality and cost efficient manner
• Manage and liaise with external consultants/vendors to discuss or resolve business systems issues and ensure high quality services are supplied

Minimum Qualifications, Skills & Experience:
• Ten years progressive experience in Information Technology (preferably in the insurance industry) with five years in a senior management position with direct reports
• University degree in a related field with a professional designation or formal qualification in information systems and/or management
• Proven experience in building effective relationships and of working through successful organizational change
• Proven track record in development and administration of diverse systems, networks and telecommunications
• In-depth knowledge of insurance and financial systems
• Working knowledge of planning and implementation processes
• Basic knowledge of database management and design
• Solid knowledge of the Local Area Network (LAN), electronic communications, network connectivity, PC based applications
• Working knowledge of COBIT and ITIL

To apply please send your resume to bdajobs@expertise.bm or apply online at www.BermudaJOBS.com.

All enquires will be dealt with in strict confidence.

Closing date: July 8, 2011
