

Requires

LANDSCAPE COORDINATOR/ESTIMATOR

We require a mature, self-motivated individual to fill the above position. The applicant must have a minimum of five years' experience and possess a recognized degree in horticulture, agriculture, or related field.

This position will involve project management, and the ability to complete the design implementation and construction of high-end residential, commercial, and institutional landscapes, as well as irrigation and lighting systems. The applicant will work very closely with the Vice President of Operations, and must possess high-level computer skills.

Other duties may include communicating with clients throughout projects, sourcing and ordering materials, inventory control, working with installation crews to achieve top-quality customer satisfaction, client account management, project costing, data collection & entry, scheduling production employees, and quantity take-offs and estimating.

EQUIPMENT OPERATOR/LANDSCAPE GARDENER

A minimum of three years' experience in the operation of excavation, earth moving & shaping equipment commonly used in landscaping, pool/spa, and irrigation and sitework projects is essential for this post. Candidates must also have excellent knowledge in successful rootballing, transporting, and installation of mature palms and medium-sized trees. Routine work will include excavation for foundations, pools, water features, and spas, trenching, grading, clearing, sifting soil and aggregates, backfilling, contouring and shaping. Other duties will include assisting landscape installation teams inclusive of hardscaping and softscaping.
