At Butterfield, we pride ourselves on being approachable, disciplined and proactive. If you embody these qualities and have the necessary experience, you may be the one we're looking for.

Enterprise Data Architect

Group Information Technology Department

This position reports to the Vice President Group IT, and is responsible for expanding the Bank's use of data as a strategic enabler of corporate goals and objectives. The responsibilities include designing, developing and implementing data models for enterprise-level application applications and systems.

Your responsibilities will include:

- developing and delivering strategic goals for data architecture vision, including a data management roadmap
- establishing processes for governing all aspects of corporate metadata
- creating strategies/plans for data security, backup, disaster recovery, business continuity and archiving
- ensuring data strategies and architecture are compliant
- liaising with technology partner to select products/services; ensuring successful implementation (e.g., FCDB, FCUBS, SAP, etc.)
- collaborating with project managers, business unit managers for all enterprise data projects
- addressing data-related problems regarding systems integration, compatibility and multiple-platform integration
- developing and implementing key components to create testing criteria
- documenting the data architecture and environment to maintain a current and accurate view of the entire data strategy
- identifying and developing opportunities for data reuse, migration or retirement
- acting as leader/advocate of data management; providing coaching, training and career development to employees

Your experience may include:

- university degree in computer science, information systems or computer engineering with eight years relevant experience and/or equivalent
- extensive experience with data architecting, data mining, large-scale data modelling and business requirements gathering/analysis; implementing enterprise data management processes, procedures and decision support
- working knowledge and understanding of relational data structures, theories, principles/practices; metadata management/associated processes; enterprise repository, data modelling/mapping and data profiling tools
- excellent communication (oral and written), interpersonal, organisation, project management, consulting, analytical, problem-solving and presentation skills
- proven ability to multi-task, prioritise and adhere to strict deadlines
- proven ability to effectively manage/develop employees
- proficient in Microsoft Office suite of applications
