Senior Network Administrator

BERMUDA COMMERCIAL BANK LIMITED

Bermuda Commercial Bank Limited is seeking a suitably qualified individual for the position of Senior Network Administrator. The Senior Network Administrator will be responsible for the maintenance and administration of the BCB Group IT systems, as well as the design, sourcing and implementation of future enhancements and upgrades to the Group's IT environment.

DUTIES & RESPONSIBILITIES:

- Design, implement and maintain the Group's network architecture maximizing application and systems performance
- Define and monitor network and application performance measurement criteria
- Define and monitor network error detection and prevention procedures
- Design and maintain the telecommunications environment
- Develop and maintain efficient system backup and restore process
- Develop and maintain the systems component of the business continuity process
- Design, implement and maintain all the banking systems security

THE SUCCESSFUL APPLICANT SHOULD POSSESS:

- At least 9-10 years experience in a mixed NT-based network environment
- Relevant MCSE 2003, CISSP, CCNA, MCDBA qualifications
- Windows 2003 Active Directory and Exchange 2003/2007 experience
- A university degree in an Information Technology discipline
- Familiarity with a range of database platforms including SQL Server, Microsoft Access and Btrieve/Pervasive
- Extensive knowledge and experience with various security platforms including: Check Point, Nokia, Tipping-Point, Linux, Qualys and various other security industry tools - CISSP – Certified Information Systems Security Professional Certification
- Extensive VMWARE and Virtual Server experience
- Internet and Intranet web-site design, implementation and support experience including use of Microsoft Sharepoint Services
- Experience in the programming and configuration of CISCO Switches and Routers
- At least 2-5 years experience in the installation, implementation, configuration and maintenance of Microsoft SQL & HP clustering running on HP Storage Area Networks EVA 4400
- On and off site disaster planning, testing and recovery experience

Reporting to the Chief Information Officer, the successful applicant will work with both business and technical staff, applying their technical knowledge and networking experience to ensure delivery of a reliable, efficient, high-performance technical environment. Building on the existing architecture, the successful candidate will maintain high systems availability, implement and maintain a comprehensive network security policy and maintain the Group's DR site, communications, systems software, applications software and all hardware.

Compensation will be commensurate with the successful candidate's experiences and will include a base salary and a discretionary performance related profit share. References will be requested and verified.

Interested persons should apply by forwarding an application letter and resume no later than: **October 28th, 2011**.
