

LINK/BERMUDA

Linking to the World.™

LinkBermuda has kept Bermuda on the leading edge of communications technology for over a century. We pride ourselves on the quality and reliability of our products and services, maintained and operated by our highly trained staff, dedicated to our core values of integrity, innovation, customer service and community commitment.

We invite suitably qualified applicants to apply for the following position within our Operations Department:

Submarine Systems Engineer

We are seeking two (2) highly motivated and technically minded individuals to fill the position of Submarine Systems Engineer within our Operations Department. The ideal candidates will be team players with logical problem-solving skills.

The successful applicants will be required to perform operational, engineering and maintenance duties on all transmission systems, standby diesel generators, power equipment, air conditioning and energy management for all LinkBermuda buildings. Responsibilities will also include supervision of external contractors and keeping building maintenance/repair records up-to-date.

QUALIFICATIONS AND EXPERIENCE:

A College level certification in electronics, air-conditioning and/or diesel engines is essential

Three (3) years' experience in an equivalent position or four (4) years' work experience demonstrating proven electromechanical competencies

Desktop computer proficiency is essential

A valid Bermuda driving license is essential

Industry standard certifications are preferred

Interested candidates should write in confidence or e-mail, enclosing an up-to-date resume, to:
